Dear Bob,

On behalf of everyone here at PPMD thank you for your service at the 2007 Ancala Golf Tournament honoring Alex Goldblum held on 2/26/2007. We are grateful for your active involvement at this year's fundraiser. Wil Berry has praised the job you and your staff did at Ancala. We wanted to send our heartfelt thanks for both the use of your product services as well as your free services offered.

Duchenne muscular dystrophy is a progressive muscle disorder that affects 1 in 3,500 boys worldwide. DMD knows no boundaries, crossing into all cultures and races. To date there is no cure, but there is hope.

Today, there is much momentum in the DMD research field. By supporting events like The Ancala Golf Tournament you are helping Parent Project Muscular Dystrophy continue to push the DMD research field and fuel that momentum. We will continue to work for a day when Duchenne and Becker muscular dystrophy will no longer affect our families and friends. With your participation at events such as this, you help us to take one step closer to this wonderful goal.

Sincerely,

Pat Furlong
President
